

“ Since taking over operations of multiple Dairy Queens in the Golden Triangle in the early 2000’s we have used Monument Constructors for all our roofing needs. After hurricane Rita, we switched all of our damaged roofs to the Dura-Last system. That was almost fifteen years ago and the roofs are holding strong. Charles Smith and his employees have provided nothing but prompt outstanding service and technical expertise. So much so, we continue to put our remaining stores in the trusted hands of Monument Constructors and the Dura-Last system. If you are looking for an honest company with high integrity, look no further than Monument Constructors.”
